

Focusing on your needs

We are here to help you

The enclosed Risk Improvement Report provides details of measures to help you manage risk within your business. AXA understand that implementing these measures will require a commitment from you and have arranged for RiskSTOP, an independent provider of risk management solutions, to contact you to offer their assistance.

RiskSTOP's assistance is provided to you free of charge.

How do RiskSTOP help you?

AXA's RiskSTOP team will provide dedicated assistance to implement the risk improvements which were discussed with you on site by the AXA Business Resilience Manager. They can advise you of approved suppliers and installers in your area, or should you prefer, arrange for them to contact you direct and provide quotations.

RiskSTOP also offer you ongoing support whilst you implement the risk improvements, and when all the work has been completed they will advise AXA and your insurance intermediary on your behalf.

What if you have your own preferred source of products or services?

No problem, providing the products or services meet the criteria and standards stipulated in the Risk Improvement Report. RiskSTOP will review progress with you and offer ongoing assistance and support should any problems arise.

What happens when all requirements are completed?

When you provide RiskSTOP with confirmation that all the requirements have been implemented, they will inform AXA and your insurance intermediary accordingly.
